circuit controlled by the periodic signal port to receive the data current; and a second circuit group comprising at least one second circuit for storing current, wherein the second circuit and the first circuit are connected in series, and the enable port controls the second circuit to duplicate and send the data current to the pixel group as required in claims 1, 6 and 8.

4. The remaining dependent claims are allowable for at least above reason.

5. The prior art made of record and not relied upon is considered pertinent to applicants' disclosure. Yamazaki et al.
